Description Information

Benefit Category

Incident to a physician's professional Service
Inpatient Hospital Services

Please Note: This may not be an exhaustive list of all applicable Medicare benefit categories for this item or service.

Item/Service Description

A. General

Nesiritide (Natrekor®) is Food and Drug Administration (FDA)-approved for the intravenous treatment of patients with acutely decompensated congestive heart failure (CHF) who have dyspnea (shortness of breath) at rest or with minimal activity. Nesiritide is not self-administered.

Indications and Limitations of Coverage

B. Nationally Covered Indications

N/A

C. Nationally Non-Covered Indications

Effective for dates of service on or after March 2, 2006, the Centers for Medicare & Medicaid Services has determined that there is sufficient evidence to conclude that the use of Nesiritide for the treatment of CHF is not reasonable and necessary for Medicare beneficiaries in any setting.

D. Other

Effective for dates of service on or after March 2, 2006, this determination applies only to the treatment of CHF and does not change Medicare Administrative Contractor discretion to cover other off-label uses of Nesiritide or use consistent with the current FDA indication for intravenous treatment of patients with acutely decompensated CHF who have dyspnea at rest or with minimal activity.
