1

Effective Date of this Version

12/01/1983

Description Information

Benefit Category

Inpatient Hospital Services

Please Note: This may not be an exhaustive list of all applicable Medicare benefit categories for this item or service.

Item/Service Description

Transplant surgeons have established a definite correlation in both cadaver and living-related kidney transplantation between pretransplant transfusions of blood into the recipient and the success of graft retention.

Indications and Limitations of Coverage

These pretransplant transfusions are covered under Medicare without a specific limitation on the number of transfusions, subject to the normal Medicare blood deductible provisions. Where blood is given directly to the transplant patient; e.g., in the case of donor specific

transfusions, the blood is considered replaced for purposes of the blood deductible provisions.

Cross Reference

See the [Medicare General Information, Eligibility, and Entitlement Manual](#)[↗], Chapter 3, §20.5.4.
