Description Information

Benefit Category

Additional Preventive Services

Please Note: This may not be an exhaustive list of all applicable Medicare benefit categories for this item or service.

Item/Service Description

A. General

Pre-exposure prophylaxis (PrEP) involves the use of antiretroviral drugs to decrease the risk of acquiring human immunodeficiency virus (HIV). Under § 1861(ddd)(1) of the Social Security Act (the Act), the Centers for Medicare & Medicaid Services (CMS) has the authority to add coverage of “additional preventive services” through the Medicare national coverage determination (NCD) process if certain statutory requirements are met: (1) reasonable and necessary for the prevention or early detection of illness or disability, (2) recommended with a grade of A or B by the United States Preventive Services Task Force (USPSTF), and (3) appropriate for individuals entitled to benefits under Part A or enrolled under Part B.

Indications and Limitations of Coverage

B. Nationally Covered Indications

Effective for claims with dates of service on or after September 30, 2024, CMS covers PrEP using antiretroviral drugs approved by the U.S. Food and Drug Administration (FDA) to prevent HIV in individuals at increased risk of HIV acquisition. The determination of whether an individual is at increased risk for HIV is made by the physician or health care practitioner who assesses the individual’s history. CMS also covers furnishing HIV PrEP using antiretroviral drugs, including the supplying or dispensing of these drugs and the administration of injectable PrEP.

For individuals being assessed for or using PrEP to prevent HIV, CMS covers all the following as an additional preventive service:

- a) Up to eight individual counseling visits, every 12 months, that include HIV risk assessment (initial or continued assessment of risk), HIV risk reduction, and medication adherence. Counseling must be furnished by a physician or other health care practitioner. Individuals must be competent and alert at the time that counseling is provided.
- b) Up to eight HIV screening tests every 12 months.
- c) A single screening for hepatitis B virus (HBV).

These screening tests are covered when the appropriate FDA-approved laboratory tests and point of care tests are used consistent with FDA-approved labeling and in compliance with the Clinical Laboratory Improvement Amendments of 1988 (CLIA) regulations.

C. Nationally Non-Covered Indications

Preventive services are non-covered by Medicare unless specifically covered in this NCD, any other NCD, in statute, or regulations.

D. Other

Medicare Part B coinsurance and deductible are waived for this preventive service.

Revision History

09/2025 - Transmittal 13400 issued September 05, 2025, is being rescinded and replaced by Transmittal 13438, dated September 30, 2025, to add a new attachment to ensure the functionality of the NCD zip URL is working properly and to update the Policy section. All other information remains the same.

The purpose of this Change Request (CR) is to provide a maintenance update of ICD-10 coding changes specific to NCDs. ([TN 13438](#)) (CR14197)

08/2025 - The purpose of this Change Request (CR) is to provide a maintenance update of ICD-10 coding changes specific to NCDs. ([TN 13375](#)) (CR14197)

12/2024 - The purpose of this Change Request (CR) is to announce that CMS has determined that Pre-Exposure Prophylaxis (PrEP) using antiretroviral drugs to prevent Human Immunodeficiency Virus (HIV) is covered as an additional preventive service under §1861(ddd)(1) of the Social Security Act (the Act). ([TN 12987](#)) (CR13843)

National Coverage Analyses (NCAs)

This NCD has been or is currently being reviewed under the National Coverage Determination process. The following are existing associations with NCAs, from the National Coverage Analyses database.
