Revision History

12/2013 - Updated per TN158

03/2013 - CMS translated the information for this policy from ICD-9-CM/PCS to ICD-10-CM/PCS according to HIPAA standard medical data code set requirements and updated any necessary and related coding infrastructure. These updates do not expand, restrict, or alter existing coverage policy. Implementation date: 10/07/2013 Effective date: 10/1/2015. ([TN 1199](#)) ([TN 1199](#)) (CR 8197)

04/2009 - Effective for services performed on and after February 12, 2009, CMS determines that open and laparoscopic Roux-en-Y gastric bypass (RYGBP), laparoscopic adjustable gastric banding (LAGB), and open and laparoscopic biliopancreatic diversion with duodenal switch (BPD/DS) in Medicare beneficiaries who have type 2 diabetes mellitus (T2DM) and a BMI less than 35 are not reasonable and necessary under section 1862(a)(1)(A) of the Social Security Act, and therefore are not covered. Additionally, effective for services performed on and after February 12, 2009, CMS determines that open and laparoscopic RYGBP, LAGB, and open and laparoscopic BPD/DS in Medicare beneficiaries who have T2DM and a BMI greater or equal to 35 improves health outcomes. Thus, type 2 diabetes mellitus is a comorbid condition related to obesity. Effective date: 02/12/2009 Implementation date: 05/18/2009. ([TN 100](#)) (CR6419)

National Coverage Analyses (NCAs)

This NCD has been or is currently being reviewed under the National Coverage Determination process. The following are existing associations with NCAs, from the National Coverage Analyses database.
